

Jordan Hellier

Software Engineer

Profile:

I am an outgoing individual who strives for career progression and continuous learning of new tools, techniques, and skills. I thrive on solving complex problems and designing innovative solutions. Outside of work, a lot of my focus is on exploring the outside, but I also have a homelab which allows me to learn various new tools and all about infrastructure, networks, and hosting. Providing me with a sandbox environment to test new technologies, skills and to learn new concepts. Additionally, I enjoy 3D printing, which allows me to design, create, and understand mechanical mechanisms.

Key Skills/technologies:

- Proficient Java knowledge with 5 years industry experience.
- Excellent Golang knowledge with 1.5 years of industry experience.
- Excellent knowledge of HTML, CSS, JavaScript/typescript, SQL
- Good knowledge of various infrastructure tools and concepts IE; Terraform, kubernetes, helm, CI/CD, AWS, docker, docker-compose
- Spring, JSF, Maven, Restful apis, GraphQL, SOAP, protobuf
- Used to both microservices and monolithic architectures.
- Excellent knowledge of scripting and linux environments.
- Customer services experience
- Problem Solving/fault finding
- Punctual and efficient
- Creative thinker
- Excellent communicator & team worker
