

Jordan Hellier

Software Engineer

Contact: jordanhellier@googlemail.com

Portfolio: jhellier.com

Profile:

Software engineer with 7 years of experience delivering software within the financial services sector. Experienced in full stack development across both legacy and cloud-native platforms using modern delivery practices. Skilled in Golang, Java, Typescript and supporting infrastructure tooling. Strong track record of improving engineering processes and mentoring junior engineers. Continuously expanding technical depth through hands-on exploration of infrastructure, networking, and systems design via homelab environments and hardware projects such as 3D printing.

Technical skills

Programming languages: Golang, Java, TypeScript, SQL (PostgreSQL), bash

Infrastructure: AWS, GCP, Kubernetes, Terraform, Ansible, Docker, Helm

Frameworks & tools: Spring, JSF, React, Vue, GraphQL, Protobuf, Maven, Make

Additional experience

- Career focussed on finance and regulation working at both ISO and FCA regulated/compliant companies. Delivering solutions for lending and investment platforms.
- Team leadership, mentoring and onboarding of engineers and interns.
- Technical interview and recruitment support.

Previous work:

Software Engineer II AJBell Touch (October 2024 - present date)

- Design and delivery of new features of a new cloud native, mobile-first investment platform.
- Produce technical designs, conduct code reviews and provide technical guidance across teams and functions.
- Drive improvements to engineering standards, development workflows and developer experience.

Software engineer Sopra banking (formally APAK group) (June 2019-oct 2024)

- Developed software for multiple international markets, implementing region-specific regulatory and compliance requirements within an ISO-regulated lending environment.
- Developed and maintained both core legacy lending products and cloud-native microservices, contributing across backend services, user interfaces, infrastructure and CI/CD pipelines.
- Progressed from Intern Software Developer to Software Engineer through increasing technical responsibility, ownership and contribution.
- Led onboarding and mentoring initiatives for interns and new starters, supporting technical development and successful integration into engineering teams.

- Team lead for onboarding and mentorship creating a safe space for new interns to learn the industry and mentoring them to their full capability.
- Assisted with first and second stage technical interviews and recruitment processes.
- Pushed and managed structure/process changes to improve knowledge sharing and team effectiveness. Giving everyone in the department a chance to progress their careers.

Shift Manager at The Place Brean & Friendly Spirit Inn (August 2018- October 2018)

Heavy customer facing role progressing into team leadership, cash handling, stock management and operations.

University accomplishments:

- PAL Leader mentor for UWE Cares team
- Dean's List first year

Education:

University Of The West Of England (UWE) (September 2017 - July 2021):

- BSC (Hons) Computer science (1st class)

Bridgwater college (2013-2017)

- Level 2 diploma in computing and I.T: merit (achieved June 2014)
- Level 3 extended diploma in IT: D*D*D* (Achieved June 2016)
